

DIESEL POWER X-TRA

DIESEL FUEL ADDITIVE

Chemtech Diesel Power X-TRA's advanced additives improve diesel fuel stability, preventing oxidation and the build-up of gums, varnish and waxes that can block fuel filters.

Specifically formulated, this additive quickly breaks down and removes contaminants from diesel fuel systems including injectors and keeps them cleaner for longer. It boosts DPF and Turbo performance in diesel engines and improves fuel economy while reducing black smoke and exhaust emissions.

1L of Chemtech Diesel Power X-TRA Fuel Additive treats up to 1000 litres of Diesel fuel.

FEATURES & BENEFITS

- Protects and cleans DPF, EGR and Turbo
- Boosts power and fuel Economy
- Cleans Injectors and fuel systems
- Aids water separation

Recommended for all diesel powered vehicles - 4WDs, buses, trucks and earth moving machinery.

DIESEL POWER X-TRA

PRODUCT CHANGE OVERVIEW

- The chamber bottle is no longer available and has been replaced with a compact metal tin. A long neck 300ml version is also available.
- The metal cans can be continuously recycled.
- The product has not changed and provides the same premium performance.
- Diesel Power is perfect for everyday use in your diesel engine to minimise fuel consumption and ensure efficient & clean operation of your vehicle.

Directions for use are updated to:

- Add 1ml of Diesel Power additive to every 1L of diesel fuel
- Use the cap to dose, 1 capful = approx. 20ml
- This means that 1 capful (20ml) treats 20L

Tip: Use a long neck funnel (purchased separately) to bypass the fuel filler flap if required. For best practice, clean the funnel with a cloth, wet the cloth and dispose in appropriate, closed waste bin.
